

Feedbacks from Our Students:

“When you check my dossier in JSSI, all you see is ‘fair’, ‘poor’ and there was no excellent. When Radio School was introduced, I was really interested because I wanted to improve on my studies and learn how to speak English. Now, my grades have improved and I can make correct sentences in English. Our teacher shared dossier weeks back and I got an ‘A’ for the first time! I am so excited and proud of myself now. I want Radio School to continue to other classes”.

Nzadam Malemadan - Government Girls Secondary School, Yola

“My favourite subject is Civic Education because it talks about “Law and My Rights”. I didn’t know about my rights as a child. But through Radio School, I now know about my rights and also know that I can report anyone who violates them without being afraid”.

Agu Joseph - National Grammar School, Nike

“My Mathematics teacher comes to school once in two weeks. Radio school now gives me the opportunity to learn mathematics often. I am really happy about it”.

Ekwe Perpetual C - Community Secondary School, Amokwu Affa

“Before I was very poor in Mathematics but now I do better. Radio School has really helped me a lot. In Basic Science, I have come to learn more about my environment, I speak better English now and in Civic Education, I have learnt about my rights to vote and be voted for. I also learnt about my rights as a child. This has helped me to know that I can stay in school and study and get married when I want to and not when anyone else want me to. The Civic Education teacher said a woman can be the President of the country so I am really hoping and working towards being the President of Nigeria soon”.

Sonia Kungwa - Government Girls Secondary School, Yola
